Equity Impact Reviews: A Framework for Integrating Equity Into Decision Making

All In National Meeting 2020
December 8
1:30 – 2:30PM

Abby Charles, MPH - Institute for Public Health Innovation
Jean B. Workman, MA - The Guilford County Coalition on Infant Mortality
Engaging in Equity Practice

1. Level Setting – Build Consensus On Racial Equity And Inclusion Principles
   1. Train your stakeholder group in equity principles
   2. Conduct an organizational racial equity analysis

2. Engage Affected Populations And Stakeholders
   Constantly Assess:
   1. Do we have the right people involved?
   2. Who else needs to be involved?
   3. What tables do we need to go to?
   4. What are the power dynamics in our interactions?
   5. How are decisions being made? Who is leading decision-making?

3. Use Data To Identify Inequitable Outcomes
4. What Are The Root Drivers Of Inequities?
5. Identify Strategies And Target Resources To Address Root Causes Of Inequities: what policy, systems and environmental changes can be implemented to address the systems and structures that create racially inequitable outcomes
6. Use An Equity Lens And Integrate Equity Assessment Strategies For Each Strategy You Implement
7. Constantly Evaluate And Adapt Strategies To Address Equity
8. Coordinating Funding and Investments for Equity

Adapted from: 7 STEPS TO ADVANCE AND EMBED RACE EQUITY AND INCLUSION WITHIN YOUR ORGANIZATION. The Annie E Casey Foundation

Use An Equity Lens And Integrate Equity Assessment Strategies For Each Strategy You Implement
Equity Impact Reviews

What are Equity Impact Reviews (EIR)?
A systematic examination of how different populations and communities will likely be affected by a proposed action or decision.

Used to minimize unanticipated adverse consequences in a variety of contexts, including the analysis of proposed policies, institutional practices, programs, plans and budgetary decisions.
Racial Equity Impact Reviews

Why are they needed?
EIRs are used to reduce, eliminate and prevent discrimination and inequities. When equity is not consciously addressed, inequity is often unconsciously replicated.

When should it be conducted?
EIRs are best conducted during the decision-making process, prior to enacting new proposals.
1. Proposed Strategy (e.g. policy, program, process, plan, system)

- Briefly describe the strategy.
- What is the intended impact or expected outcome of the strategy?
- How does the strategy affect equity? Racial equity and other community priorities?
## Factors that contribute to equity

<table>
<thead>
<tr>
<th>Check all that apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access to healthy food</td>
</tr>
<tr>
<td>Access to safe, affordable, housing for all people</td>
</tr>
<tr>
<td>Supportive neighborhoods/social support/social capital</td>
</tr>
<tr>
<td>Healthy indoor and outdoor places</td>
</tr>
<tr>
<td>Access to safe, clean, and quality indoors or outdoor spaces, such as parks, trees, and playgrounds</td>
</tr>
<tr>
<td>Early childhood development services and community supports</td>
</tr>
<tr>
<td>Education that provides high quality and culturally appropriate education for each student</td>
</tr>
<tr>
<td>Job training and jobs that provide all residents a livable income</td>
</tr>
<tr>
<td>Community economic development that supports local homes, businesses, buildings and land</td>
</tr>
<tr>
<td>Factors that contribute to equity</td>
</tr>
<tr>
<td>---------------------------------</td>
</tr>
<tr>
<td>Public safety that includes fire, police, emergency medical services, and code enforcement</td>
</tr>
<tr>
<td>Law and justice system that provides equitable access and fair treatment for each person</td>
</tr>
<tr>
<td>Transportation that provides everyone with safe, efficient, affordable, convenient, and reliable transportation</td>
</tr>
<tr>
<td>Health and human services that are high quality, affordable, and culturally appropriate</td>
</tr>
<tr>
<td>Organizations routinely assess and eliminate all forms of intentional or unintentional policies or practices that have negative impacts related to race, gender, ethnicity, people with low income, people with disabilities, national origin, sexual orientation or gender identity</td>
</tr>
<tr>
<td>Other (describe)</td>

Consider the Population

*Who has been most affected, are they included in the design of this strategy?*

1. Identify whom the proposed strategy affects most, positively and negatively. (Who are the racial/ethnic groups in the area?)
2. What has been the history of this issue in the community/with each racial/ethnic group?
   1. Do current disparities exist by race/ethnicity around this issue or closely related ones?
   2. How did they get that way?
   3. If disparities exist, how will they be affected by this policy/program/practice?
3. For this policy/program/practice, what results are desired, and how will each group be affected?
4. Have the people affected by this issue been involved in developing the solutions? Are the voices of all groups affected by the action at the table?
5. What do the people affected by this project think the important issues are?
6. Does this project fit with their priorities?
7. For this policy/program/practice, what strategies are being used, and how will they be perceived by each group?

---

<sup>*</sup> Indicates an expanded discussion to include population-specific impacts.
4. Modify strategy, plan evaluation, and determine final recommendations or decisions

a. Summarize your recommendations for how the original proposal could be adjusted, modified or eliminated in order to most effectively promote equity, health, quality of life, and other community priorities?

b. Who else needs to be at the table to achieve the desired outcomes? Consider other departments, external organizations (local, regional, statewide), non-profits, faith-based, neighborhoods, for-profit, etc.

c. Identify measures you would use to evaluate the impact of this project or policy on equity, health, quality of life, and other community priorities.

d. How does your department, work unit, and or program impact, benefit from, or otherwise relate to the issues raised? How can you contribute to the most successful implementation of this strategy?
